

**Statement of Interest – School Board Nomination**

I would like to nominate for School Board to contribute towards strong governance capability, strategic oversight and financial stewardship to support the school's continued growth and long-term sustainability.

I am a CPA-qualified professional with a Master of Professional Accounting and a Bachelor of Commerce, and I bring 17 years of experience across State and Local Governments in various Finance roles. My background includes financial management, governance frameworks, policy development, risk oversight and performance evaluation. Throughout my career, I have been responsible for accountable decision-making, stakeholder engagement and aligning resources with clearly defined strategic objectives. I understand the importance of transparency, evidence-based planning and maintaining a long-term perspective in environments that serve the broader community.

I have been a local resident for over 13 years, and my two daughters attend the school. I have a genuine, long-term interest in the school's success — not only from a governance perspective, but as a parent invested in the quality of education, culture and opportunities available to all children.

For the past two years, I have served as Treasurer of the School P&C and have also undertaken additional roles supporting its broader objectives. During this time, I have worked collaboratively with the Canteen, Uniform and Fundraising teams, as well as with the school, to strengthen financial sustainability and deliver outcomes that benefit the school community. This experience has provided valuable insight into both the operational and community aspects of the school, and the importance of aligning effort, funding and strategic direction.

If elected to the Board, I will bring a forward-looking and disciplined approach to governance. I am committed to constructive collaboration, thoughtful oversight and supporting decisions that are sustainable, practical and centred on student outcomes.

My focus will be on contributing positively, asking considered questions, and helping ensure that the school's strategic direction is supported by sound governance and responsible financial planning for the benefit of the entire school community.

Kind regards

Hitesh Hans
